SYDNEY NSW 2000

GEORGETOWN ALLUVIAL GOLD RECOVERY PLANT

ERO Mining Limited wish to advise that the operating gold recovery plant located at the western limits of ML30091 has sufficient gold bearing alluvial gravels for continuing mining activities.

Due to the onset of the wet season the gold recovery plant and site operations will shut down effective 1 December 2010 and all plant and equipment will be relocated to high ground or taken off site for scheduled maintenance.

As previously reported, ERO Mining is reviewing options in relation to the Georgetown operations and is in discussions with a number of interested parties.

TANAMI EXPLORATION INITIATIVE

ERO Mining Limited has applied for eight exploration licences in the Tanami Desert region, within Aboriginal Freehold Land and Pastoral land.

Following collaborative and final consultation, the Traditional Owners have agreed to submit a Deed for Exploration consenting to grant an exploration licence over the prospective Suplejack tenement (ELA26625) that is scheduled for presentation to the Executive Council of the Central Lands Council in December 2010.

In anticipation of the passing of the Deed for Exploration resolution the company plans to commence on-ground exploration in the first quarter of 2011. The Suplejack project will be the Company's first foray into the high discovery potential of the Tanami Desert in pursuit of Ranger Style high grade unconformity related uranium deposits and Callie Style high grade gold deposits.
