Opening Date	3 April 2012
Closing Date	23 April 2012

## Part 1 – General Information

### What is the Rights Issue?

This is an offer of approximately 360 million New Shares to our Eligible Shareholders who are registered on the Record Date. The New Shares are being offered on the basis of one New Share for every Share then held.

Fractional entitlements will be rounded up to the nearest whole New Share. The number of New Shares to which you are entitled is shown on the accompanying Entitlement and Acceptance Form.

### What is the issue price?

The issue price is 0.5 cents (one half of one cent) per New Share and is payable in full on application.

### What is the purpose of the Rights Issue?

Under the Rights Issue, we are seeking to raise approximately \$1.8 million (before expenses).

The net proceeds from the Rights Issue will be used for working capital purposes and to fund exploration and development, including:

- Geophysical surveys and subsequent drill programs at the Peeweena Dam prospect Billa Kalina SA (ERO in joint venture with Maximus Resources Ltd (ASX:MXR)) which is located 70km north-north west of the Olympic Dam copper-gold-uranium mine and 45km east of the mine development at Prominent Hill. Finalisation of the Deed of Access – Exploration with the Defence Department will allow the completion of a detailed gravity survey and drill testing of the Peeweena Dam gravity anomaly, targeting iron oxide, copper, gold, uranium mineralisation similar to the nearby Olympic Dam and Prominent Hill mines.
- Advancing the Company's portfolio of gold/uranium exploration licences and licence applications in the Tanami region of the Northern Territory (ERO 100%), which has become Australia's premier Proterozoic Gold Province capable of hosting multi-million ounce gold deposits. Encouraging results from geochemical surveys conducted during the 2011 field season, including the discovery of significant arsenic anomalies indicating potential for associated gold mineralisation, require follow-up in conjunction with further ground based exploration of both the Suplejack and Talbot North project areas.

### Opening and Closing Dates

The Rights Issue will open for receipt of acceptances on the Opening Date and closes on the Closing Date. Our directors reserve the right to close the Rights Issue early or extend the Closing Date. You should lodge your Entitlement and Acceptance Form as soon as possible.

### Can you transfer your right to New Shares?

The rights to New Shares are non-renounceable, which means that rights may not be traded.

### What are the rights attached to New Shares?

New Shares will be issued on the same terms as our Shares that are already on issue. Full details of the rights attached to Shares are set out in our constitution. You can inspect a copy of our constitution at our registered office.

A summary of the rights attached to Shares follows.

#### • Voting rights

Subject to any rights or restrictions attached to any class of Shares, at a meeting of our members: on a show of hands each member has one vote; and on a poll each member has one vote for each fully paid Share they hold, and a fraction of a vote for each partly paid Share they hold.

#### • Dividends

Subject to the terms on which Shares are on issue, the directors may pay dividends as they see fit.

#### • Future issues of Shares

Subject to the Corporations Act 2001 (Cth), the Listing Rules and our constitution, the Company may issue Shares and grant options over unissued Shares, under the control of our directors. We may issue preference shares on terms approved by special resolution. We may reduce our share capital, buy-back Shares and convert Shares into a larger or smaller number.

#### • Share transfers

Subject to our constitution and the Listing Rules, a shareholder may transfer a Share by an instrument of transfer in any common form or other form approved by the directors.

#### • Variation of rights

The rights and privileges attaching to Shares can be altered by special resolution of the shareholders. A special resolution is a resolution passed by at least 75% of the votes cast by members entitled to vote on the resolution.

#### • Rights on Winding Up

If on a winding up there are enough assets to repay all capital to shareholders, all capital must be repaid to the shareholders and any surplus must be distributed among the shareholders in proportion to the amounts paid on their respective shares before the winding up began.

Subject to any special rights or restrictions attached to Shares, on a winding up, the liquidator may, with the sanction of a special resolution of shareholders, distribute among the shareholders the whole or any part of our property (in its actual state) and decide how to distribute the property as between the shareholders or different classes of shareholders.

### Is there a minimum capital raising?

There is no minimum limit to the amount of capital to be raised under this Rights Issue.

### Shortfall in subscription

Our directors reserve the right to issue any shortfall in subscription for New Shares at their discretion within three months after the close of the Rights Issue.

## Part 4 – Summary of risks

Like all investments, the market price of our Shares may fall as well as rise.

Our potential returns are subject to risks specific to us and to general risks.

You should consider all risks before you make a decision about this Rights Issue. It is impossible to identify all risks, but we draw your attention to the following.

### General market conditions

The price of Shares on ASX may rise or fall due to numerous factors including the following:

- General economic conditions, including changes in prices and interest rates.
- Variations in the local and global markets for listed shares in general, or for mining stocks in particular.
- Changes to government policy, legislation or regulation.
- Competition in the industry in which we operate.
- General operational and business risks.
- Demand for commodities.

### Future capital requirements

We may require additional funds to carry out further exploration or development of our existing or new projects. Our ability to raise those funds within an acceptable time frame, and on terms acceptable to us, will vary according to a number of factors including: the prospects of new projects (if any); the results of exploration and subsequent feasibility studies; stock market and industry conditions; and the price of relevant commodities.

### Exploration and development

Exploration by its nature contains elements of significant risk. Ultimate success depends on the discovery of economically recoverable resources, obtaining the necessary titles and governmental regulatory approvals and getting suitable finance for mining operations, if and when a decision to mine is made.

There can be no assurance that our existing projects, or any other projects or tenements that we may acquire in the future, will result in the discovery of significant resources. Even if significant resources are identified, there can be no guarantee they will be able to be economically exploited.

The factors that will impact on our future exploration and possible production activities include the following:

- Geological conditions.
- Limitations on activities due to seasonal weather patterns.
- Alterations to joint venture programmes and budgets.
- The availability of drilling rigs and other machinery necessary for the Company to undertake its activities.
- Unanticipated operational and technical difficulties encountered in survey, drilling and production activities.

- Mechanical failure of operating plant and equipment, adverse weather conditions, industrial and environmental accidents, industrial disputes and other events outside our control.
- Unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.
- Prevention or restriction of access by reason of political unrest, outbreak of hostilities, and inability to obtain consents or approvals (including clearance of work programs pursuant to existing, and any future access agreements entered into with future registered Aboriginal Land Council and native title claimants).

### Loss of key personnel

Our success depends on the competencies of our directors and senior management. The loss of one or more of our directors or senior management could have a materially adverse effect on our business, financial position and operations. The resulting impact from such an event would depend on the quality of any replacement.

### Native title and Aboriginal heritage

Some of our tenements are located within areas that are the subject of claims or applications for native title determination. The *Native Title Act 1993* (Cth) and related State native title legislation and Aboriginal heritage legislation may affect our ability to obtain access to certain of our exploration areas or to obtain mining production titles. Settling any claims will incur costs to us. The degree to which this may impact on our activities will depend on a number of factors, including the status of particular tenements and their locations. At this stage, we are not able to quantify the impact, if any, of such matters on our operations.

### Title

All mining tenements that we may acquire are regulated by applicable state mining legislation. There is no guarantee the tenements we apply for will be granted. Also, grant of a tenement will be subject to conditions.

### Environment

Our projects are subject to State and Federal laws and regulations regarding environmental matters. Our activities and operations cannot be carried out without prior approval by all relevant authorities. Resource activities can be environmentally sensitive and can give rise to substantial costs for environmental rehabilitation, damage control and losses. We intend conducting our activities in an environmentally responsible manner and in accordance with all applicable laws.

### Agreements with third parties

We have signed various contracts with others. There is a risk of financial failure or default by the other party to these arrangements. Any breach or failure may lead to penalties or termination of the relevant contract. In addition, our interest in the relevant subject matter (tenement, for example) may be jeopardised.
